The "Sales Engineering" Funnel

In this role, your value is added at specific stages of the sales cycle. Here is how your expertise typically maps to the process:

1. **Discovery:** Uncovering the technical "pain" of the client.
2. **Validation:** Proving your product solves that pain via a Demo or POC.
3. **Technical Win:** The client's engineers agree your solution works.

4. **Closing:** Finalizing the SOW and handing off to the Implementation team.
